Canadian energy investment expands U.S. natural gas infrastructure

Enbridge, a Canadian energy leader, has completed its acquisition of **Public Service Company of North Carolina (PSNC)** and will now operate as **Enbridge Gas North Carolina**. Serving over 600,000 customers in key growth areas like Raleigh, Durham, Gastonia, and Asheville, this expansion strengthens U.S. energy infrastructure and supports regional economic growth.

PSNC's assets include 13,000+ miles of natural gas pipelines, a new liquefied natural gas (LNG) storage facility under construction, and minority interests in a natural gas transmission pipeline lateral and another LNG storage facility—all enhancing system reliability and supply security.

"We are excited to work with our new PSNC employees to integrate the assets and complement the growth we are already seeing in Ohio and Utah," said Michele Harradence, Enbridge Executive Vice President and President, Gas Distribution and Storage.

This Canadian investment reinforces North Carolina's energy security, ensuring reliable, efficient, and expanded natural gas services for businesses and households alike.

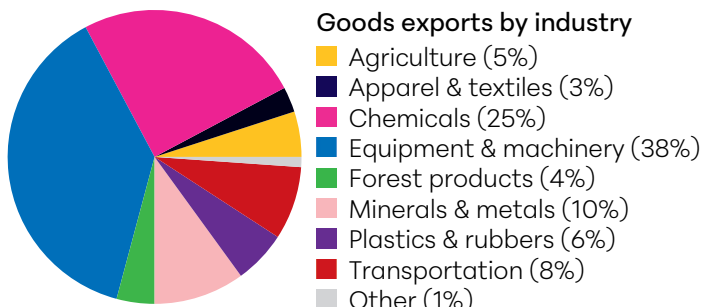

918 Canadian-owned companies employ 17,600 workers in North Carolina

Canada is the #1 export market for North Carolina

North Carolina exports \$8.7 billion in goods to Canada annually

North Carolina exports \$2.4 billion in services to Canada, including

Motor vehicle parts.....	\$202 million
Computers.....	\$157 million
Paper & paperboard.....	\$139 million
Books & printed material.....	\$130 million

Canadian airlines expand direct flights to North Carolina

Air Canada and **WestJet**, Canada's two largest airlines, will launch new direct flights from Western Canada to North Carolina's Research Triangle region this summer, doubling the number of Canadian airports served by Raleigh-Durham International Airport (RDU) to four.

Air Canada will introduce seasonal non-stop service between RDU and Vancouver, operating three times weekly from June 5 to September 30. Vancouver International Airport (YVR) is a preclearance airport, allowing U.S.-bound travelers to clear U.S. Customs and Immigration before departure, ensuring a faster, more convenient travel experience.

"We are thrilled to add non-stop services from the Raleigh-Durham region to Vancouver! Our considerable network from Vancouver means customers in the Research Triangle region have fast, convenient access to visit everything beautiful BC has to offer or connect easily and seamlessly to other destinations in Western Canada, or to Japan, Korea, and other international destinations in Asia from our YVR trans-Pacific hub," said Mark Galardo, Executive Vice President, Revenue and Network Planning at Air Canada.

WestJet will also launch seasonal nonstop service from RDU to Calgary, operating June 9 through October 13. These new routes, following American Airlines' launch of Charlotte-Vancouver service last year, highlight the growing business and tourism ties between the U.S. Southeast and Canada, while also positioning Canada as a key transit point for travelers heading to Asia and beyond.

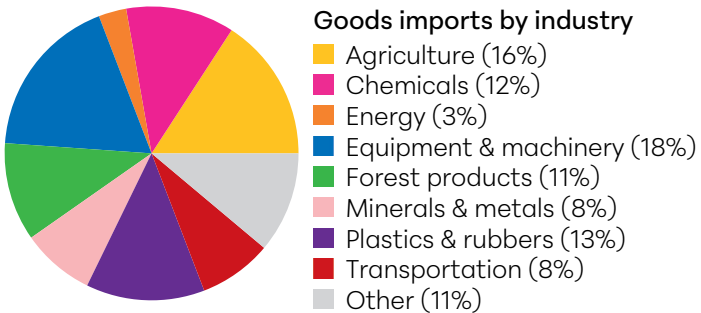

Canada invests in North Carolina

Trade with Canada supports **241,400 employees in North Carolina** in addition to the **17,600 employees** at Canadian-owned businesses across the state. In addition, North Carolina exports \$11.1 billion in goods and services to Canada.

Canadian-owned companies, including **Circle K**, **RBC**, **Nutrien Ag Solutions** and **Carrols**, are major contributors to North Carolina's economy. They employ residents in every sector and contribute to the local economy with salary dollars, paying local taxes, and the purchase of goods and services in their supply chain.

North Carolina imports \$4.7 billion in goods from Canada annually
